SUBJECT INDEX

Advanced Cardiac Life Support Protocols
"helper:" a critical events prompter for unexpected emergencies (Schneider et al), 358
Algorithms. *See under* Mathematics
Analgesia
postoperative
respiratory monitoring during postoperative analgesia (Gordh et al), 365
Anesthesia
depth
brief wakeful response to command indicates wakefulness with suppression of memory formation during surgical anesthesia (Dutton et al), ORIGINAL ARTICLE, 41
eeg bispectrum predicts movement during thiopental/isoflurane anesthesia (Sebel et al), ORIGINAL ARTICLE, 83
emergencies
"helper:" a critical events prompter for unexpected emergencies (Schneider et al), 358
pediatric
a new pediatric respiratory monitor that accurately measures imposed work of breathing: a validation study (Berman et al), ORIGINAL ARTICLE, 14
scheduling
a fuzzy logic system for prioritizing surgical cases (Engel), 266A
Anesthesia machines. *See under* Equipment
Anesthesia techniques, safety
Italy publishes anesthesia monitoring protocols (Torri), APSF NEWSLETTER, 71
Anesthesiologists
the impact of technology on physician cognition and performance (Woods et al), EDITORIAL, 5
manual record keeping is not necessary for anesthesia vigilance (Loeb), ORIGINAL ARTICLE, 9
workload
real-time workload assessment during anesthesia (Weinger et al), 259A
Anesthetics
gases, nitric oxide
method of delivering constant nitric oxide concentrations during full and partial ventilatory support (Putensen et al), ORIGINAL ARTICLE, 23
intravenous
effects of intravenous anesthetic agents on middle cerebral artery blood flow velocity during induction of general anesthesia (Thiel et al), ORIGINAL ARTICLE, 92
fentanyl
brief wakeful response to command indicates wakefulness with suppression of memory formation during surgical anesthesia (Dutton et al), ORIGINAL ARTICLE, 41
standard rate titration range and customized mixes of intravenous anesthetics are a more effective method of teaching intravenous anesthesia (Teeple, McConnell), 273A
local
use of an indicator dye and near-infrared spectroscopy to detect an intravascular injection of local anesthetic (Chen, Laurito), 279A
volatile
carbon monoxide poisoning during anesthesia poses puzzles (Lentz), APSF NEWSLETTER, 66
cost calculations of inhaled anesthetics from CPRA system records (Edsall, Thompson), 280A
desflurane
erroneous mass spectrometer readings caused by desflurane and sevoflurane (Abel, Eisenkraft), ORIGINAL ARTICLE, 152
gas man explains the cost of inhalation anesthesia (Philip), 282A
isoflurane
eeg bispectrum predicts movement during thiopental/isoflurane anesthesia (Sebel et al), ORIGINAL ARTICLE, 83
in my opinion: carbon monoxide: what should we do? (Epstein), APSF NEWSLETTER, 217
refractive indices for volatile anesthetic gases: equipment and method for calibrating vaporizers and monitors (Wallroth et al), ORIGINAL ARTICLE, 168
sevoflurane
erroneous mass spectrometer readings caused by desflurane and sevoflurane (Abel, Eisenkraft), ORIGINAL ARTICLE, 152
Anesthetic techniques
costs and cost analysis
an automated information management system can produce roi and improve anesthesia practice (Pettus), 267A
cost calculations of inhaled anesthetics from CPRA system records (Edsall, Thompson), 280A
how much for a life? (Davies, Duncan), 277A
increase in charges from implementation of an automated charge generation software program, analog (Stonemetz, Edsall), 282A
education
electronic prepublication of journal of clinical monitoring abstracts (Ruskin), 272A
proficiency exams for evaluation of education in anesthesia technology (Frazier et al), 273A
standard rate titration range and customized mixes of intravenous anesthetics are a more effective method of teaching intravenous anesthesia (Teeple, McConnell), 273A
supplemental resident education using computer-assisted instruction programs (Seitman et al), 285A
technology education for anesthesia residents: experiences and expectations (Van Alstine et al), 271A
quality assurance
computerized detection of quality assurance incidents using an automated anesthesia record-keeping system (Sanborn et al), 276A
QA program reveals safety issues, promotes development of guidelines: Arizona practice is model (Blitt et al), APSF NEWSLETTER, 76

January issue, pp 1–80; March issue, pp 81–150; May issue, pp 151–222; July issue, pp 223–286; September issue, pp 287–350; November issue, pp 351–430. An "A" following a page number indicates an abstract.

Anesthetic techniques (*continued*)
risk management
QA program reveals safety issues, promotes development of guidelines: Arizona practice is model (Blitt et al), APSF NEWSLETTER, 76
safety
cause of CO poisoning, relation to halogenated agents still not clear (Moon), APSF NEWSLETTER, 67
first ever guidelines issued in Japan guidelines for safe anesthesia, Japan society of anesthesiology, April 21, 1993, APSF NEWSLETTER, 67
medical gas contamination: an unrecognized patient danger (Moss), APSF NEWSLETTER, 73
shutdown of gas supply system need not be dangerous: planning minimizes risks (Peterson, Evans), APSF NEWSLETTER, 144
simulations
a "biodegradeable" anesthesia simulator (Odom et al), 275A
gas man explains the cost of inhalation anesthesia (Philip), 282A
Apnea. *See under* Ventilation
Arrhythmia. *See under* Heart
Arteries
pulsing
the effect of pulsating arteries on reflectance pulse oximetry: measurements in adults and neonates (Nijland et al), ORIGINAL ARTICLE, 118
supraorbital
noninvasive blood pressure monitoring from the supraorbital artery using an artificial neural network oscillometric algorithm (Narus et al), ORIGINAL ARTICLE, 289
optimal sites for forehead oscillometric blood pressure monitoring (Lee et al), ORIGINAL ARTICLE, 298
Association for the Advancement of Medical Instrumentation
clinical evaluation of the oscillometric blood pressure monitor in adults and children based on the 1992 AAMI sp-10 standards (Ling et al), ORIGINAL ARTICLE, 123
Attention
comparison of two methods to assess intraoperative vigilance (Loeb), 269A
the impact of technology on physician cognition and performance (Woods et al), EDITORIAL, 5
letter to the editor (Black), 416
letter to the editor (Cohen et al), 417
letter to the editor (Feinstein), 417
letter to the editor (Goihl), 417
letter to the editor (Saenz), 417
letter to the editor (Siler), 417
manual record keeping is not necessary for anesthesia vigilance (Loeb), ORIGINAL ARTICLE, 9
Automated record keeping. *See under* Equipment

Blood, hemoglobin
accuracy of pulse oximetry during sickle cell vaso-occlusive crisis (McMahon et al), 269A
simultaneous in vivo comparison of two- *versus* three-wavelength mixed venous (SVO_2) oximetry catheters (Bongard et al), ORIGINAL ARTICLE, 329
Blood pressure, measurement
an alternative method of validating blood pressure measurement: the sphygmooscillographic method (Sapinski), CORRESPONDENCE, 348
clinical evaluation of continuous noninvasive blood pressure monitoring: accuracy and tracking capabilities (Young et al), ORIGINAL ARTICLE, 245
clinical evaluation of the oscillometric blood pressure monitor in adults and children based on the 1992 AAMI sp-10 standards (Ling et al), ORIGINAL ARTICLE, 123
evaluation of the pulse wave arrival time as a marker for blood pressure changes in critically ill infants and children (Wippermann et al), ORIGINAL ARTICLE, 324
indirect blood pressure measurement using the Riva Rocci Korotkoff method (de Jong, Ros), CORRESPONDENCE, 149
noninvasive blood pressure monitoring from the supraorbital artery using an artificial neural network oscillometric algorithm (Narus et al), ORIGINAL ARTICLE, 289
optimal sites for forehead oscillometric blood pressure monitoring (Lee et al), ORIGINAL ARTICLE, 298
validation of blood pressure measuring devices (O'Brien et al), CORRESPONDENCE, 257
Brain
blood flow
effects of intravenous anesthetic agents on middle cerebral artery blood flow velocity during induction of general anesthesia (Thiel et al), ORIGINAL ARTICLE, 92
intraoperative data acquisition for the study of cerebral dysfunction following cardiopulmonary bypass (Heyer et al), ORIGINAL ARTICLE, 305
transcranial optical path length in infants by near-infrared phase-shift spectroscopy (Benaron et al), ORIGINAL ARTICLE, 109
oxygenation
transcranial optical path length in infants by near-infrared phase-shift spectroscopy (Benaron et al), ORIGINAL ARTICLE, 109
Brain death
$ETCO_2$ elevation in cerebral death: an unusual capnographic phenomenon (Sofianos), CASE REPORT, 134
Brody's equation. *See under* Mathematics
Burns. *See under* Complications

Capnography. *See under* Measurement techniques
Capnometers. *See under* Equipment
Carbon dioxide
measurement
$ETCO_2$ elevation in cerebral death: an unusual capnographic phenomenon (Sofianos), CASE REPORT, 134
rebreathing improves accuracy of ventilatory monitoring (Bowie et al), 354
terminology and the current limitations of time capnography: a brief review (Bhavani-Shankar et al), ORIGINAL ARTICLE, 175
measurement of CO_2 response with the breath-by-breath automatic acquisition of the breathing pattern and occlusion pressure (Torjman et al), CORRESPONDENCE, 220
production
effect of measurement errors on cardiac output calculated with O_2 and modified CO_2 Fick methods (Mahutte, Jaffe), ORIGINAL ARTICLE, 99

Carbon monoxide
poison
in my opinion: carbon monoxide: what should we do? (Epstein), APSF NEWSLETTER, 217
poisoning
carbon monoxide poisoning during anesthesia poses puzzles (Lentz), APSF NEWSLETTER, 66
Catheter obstruction. *See under* Complications
Catheters. *See under* Equipment
Cerebral dysfunction. *See under* Complications
Complications
anesthesia emergencies
"helper:" a critical events prompter for unexpected emergencies (Schneider et al), 358
patient simulator identifies faulty h-cylinder (Euliano et al), 394
burns
intraoperative reflectance oximetry in burn patients (Sheridan et al), ORIGINAL ARTICLE, 32
pulse oximetry in an extensively burned patient (Imaizumi et al), CORRESPONDENCE, 80
carbon monoxide poisoning
carbon monoxide poisoning during anesthesia poses puzzles (Lentz), APSF NEWSLETTER, 66
in my opinion: carbon monoxide: what should we do? (Epstein), APSF NEWSLETTER, 217
cerebral dysfunction
intraoperative data acquisition for the study of cerebral dysfunction following cardiopulmonary bypass (Heyer et al), ORIGINAL ARTICLE, 305
fire
end-tidal oxygen concentration and pulse oximetry for monitoring oxygenation during intratracheal jet ventilation (Baer et al), 373
hyperkalemia
editorial: sux debate shows process of drug education: committee chair details events (Miller), APSF NEWSLETTER, 143
FDA group urges sux label reduced to "warning" (Morell), APSF NEWSLETTER, 141
intravenous catheter obstruction
is the iv obstructed or infiltrated? a simple clinical test (Goodie), ORIGINAL ARTICLE, 47
tachycardia
pacemaker malfunction due to microcurrent injection from a bioimpedance noninvasive cardiac output monitor (Aldrete et al), CASE REPORT, 131
trauma
an audio-video system for automated data acquisition in the clinical environment (Mackenzie et al), ORIGINAL ARTICLE, 335
vascular
use of an indicator dye and near-infrared spectroscopy to detect an intravascular injection of local anesthetic (Chen, Laurito), 279A
Computers. *See under* Equipment
Connectors. *See under* Equipment
Cylinders. *See under* Equipment

Desflurane. *See under* Anesthetics, volatile
Doppler ultrasound. *See under* Measurement techniques
Drug labeling
editorial: sux debate shows process of drug education: committee chair details events (Miller), APSF NEWSLETTER, 143
FDA group urges sux label reduced to "warning" (Morell), APSF NEWSLETTER, 141

Echocardiography. *See under* Measurement techniques
Education
arrhythmia tutor: interactive multimedia software designed to teach arrhythmia recognition for advanced cardiac life support (ACLS) courses (Lee et al), 279A
a "biodegradeable" anesthesia simulator (Odom et al), 275A
distributed programs as building blocks for a comprehensive simulated teaching environment (Vaduva et al), 264A
proficiency exams for evaluation of education in anesthesia technology (Frazier et al), 273A
residents
standard rate titration range and customized mixes of intravenous anesthetics are a more effective method of teaching intravenous anesthesia (Teeple, McConnell), 273A
supplemental resident education using computer-assisted instruction programs (Seitman et al), 285A
technology education for anesthesia residents: experiences and expectations (Van Alstine et al), 271A
Electrocardiograph. *See under* Equipment
Electroencephalograph. *See under* Equipment
Electroplethysmograph. *See under* Equipment
Endotracheal cuffs. *See under* Equipment, cuffs
Equipment
anesthesia machines
carbon monoxide poisoning during anesthesia poses puzzles (Lentz), APSF NEWSLETTER, 66
human factors in the design and evaluation of anesthesia equipment: a survey of anesthesia equipment manufacturers (Botney), 263A
in my opinion: carbon monoxide: what should we do? (Epstein), APSF NEWSLETTER, 217
refractive indices for volatile anesthetic gases: equipment and method for calibrating vaporizers and monitors (Wallroth et al), ORIGINAL ARTICLE, 168
audiotape recorders
an audio-video system for automated data acquisition in the clinical environment (Mackenzie et al), ORIGINAL ARTICLE, 335
automated record keeping
an automated information management system can produce roi and improve anesthesia practice (Pettus), 267A
an expert system to teach troubleshooting of common problems associated with the automated anesthesia recordkeeper (Block et al), TECHNICAL NOTE, 207
computerized detection of quality assurance incidents using an automated anesthesia record-keeping system (Sanborn et al), 276A
computerized preanesthesia evaluation of surgical inpatients increases secondary diagnoses noted by hospital coders (Gibby et al), 268A
early benefits from the implementation of a real-time patient tracking system for surgical patients (Gunnerson et al), 281A
electronic records reduce private practice expenses (Edsall, Stonemetz), 281A

Equipment (*continued*)
electronic signatures in a hospital information system environment (Campbell, Gibby), 276A
the evolution of the anesthetic record: the impact of modern technology (Ferrari et al), 285A
LabVIEW: a software system for data acquisition, data analysis, and instrument control (Kalkman), KNOWING YOUR MONITORING EQUIPMENT, 51
measurement of CO_2 response with the breath-by-breath automatic acquisition of the breathing pattern and occlusion pressure (Torjman et al), CORRESPONDENCE, 220
safety and efficacy of a ventilator database interface (Gilmour, Gove), CASE REPORT, 183
satisfaction after the installation of an automatic anesthesia record-keeping system in an academic anesthesia department (Coleman et al), 274A
usage and financial value of access to computerized database of medical records during preanesthetic evaluation (Gibby et al), 260A
calibration
refractive indices for volatile anesthetic gases: equipment and method for calibrating vaporizers and monitors (Wallroth et al), ORIGINAL ARTICLE, 168
capnometers
$ETCO_2$ elevation in cerebral death: an unusual capnographic phenomenon (Sofianos), CASE REPORT, 134
rebreathing improves accuracy of ventilatory monitoring (Bowie et al), 354
terminology and the current limitations of time capnography: a brief review (Bhavani-Shankar et al), ORIGINAL ARTICLE, 175
catheters
an automated small bolus cardiac output measurement system (Orr et al), 267A
arterial
clinical evaluation of continuous noninvasive blood pressure monitoring: accuracy and tracking capabilities (Young et al), ORIGINAL ARTICLE, 245
intravenous
is the iv obstructed or infiltrated? a simple clinical test (Goodie), ORIGINAL ARTICLE, 47
venous
intraoperative data acquisition for the study of cerebral dysfunction following cardiopulmonary bypass (Heyer et al), ORIGINAL ARTICLE, 305
simultaneous in vivo comparison of two- *versus* three-wavelength mixed venous (SVO_2) oximetry catheters (Bongard et al), ORIGINAL ARTICLE, 329
circuits, Mapleson D
rebreathing improves accuracy of ventilatory monitoring (Bowie et al), 354
computers
an audio-video system for automated data acquisition in the clinical environment (Mackenzie et al), ORIGINAL ARTICLE, 335
distributed programs as building blocks for a comprehensive simulated teaching environment (Vaduva et al), 264A
a fuzzy logic system for prioritizing surgical cases (Engel), 266A
"helper:" a critical events prompter for unexpected emergencies (Schneider et al), 358
the impact of technology on physician cognition and performance (Woods et al), EDITORIAL, 5
increase in charges from implementation of an automated charge generation software program, analog (Stonemetz, Edsall), 282
noninvasive blood pressure monitoring from the supraorbital artery using an artificial neural network oscillometric algorithm (Narus et al), ORIGINAL ARTICLE, 289
technology education for anesthesia residents: experiences and expectations (Scamman), 271A
connectors
patient simulator identifies faulty h-cylinder (Euliano et al), 394
cuffs, endotracheal
a system to calculate tracheal pressure from the endotracheal tube cuff (Wilder et al), 258A
cylinders
patient simulator identifies faulty h-cylinder (Euliano et al), 394
Doppler
intraoperative data acquisition for the study of cerebral dysfunction following cardiopulmonary bypass (Heyer et al), ORIGINAL ARTICLE, 305
a research tool for transcranial Doppler studies: a PC-based data acquisition and archival system (Kapur, Doblar), 261A
echocardiographs
transesophageal echocardiography and monitoring applications (Connor), 396
electrocardiograph
spurious ST segment depression by automated ST segment analysis (Brooker, Lownstein), CASE REPORT, 186
electrocardiography
evaluation of the pulse wave arrival time as a marker for blood pressure changes in critically ill infants and children (Wippermann et al), ORIGINAL ARTICLE, 324
electroencephalograph
eeg bispectrum predicts movement during thiopental/isoflurane anesthesia (Sebel et al), ORIGINAL ARTICLE, 83
electroplethysmograph
transbronchial regional electroplethysmography of the lungs (Mazhbich), ORIGINAL ARTICLE, 225
lasers
end-tidal oxygen concentration and pulse oximetry for monitoring oxygenation during intratracheal jet ventilation (Baer et al), 373
medical gas/vacuum systems
do you know your MGVS? what do anesthesiologists know about their MGVS? (Peterson), 415
medical gas contamination: an unrecognized patient danger (Moss), APSF NEWSLETTER, 73
shutdown of gas supply system need not be dangerous: planning minimizes risks (Peterson, Evans), APSF NEWSLETTER, 144
monitors
manual record keeping is not necessary for anesthesia vigilance (Loeb), ORIGINAL ARTICLE, 9
nerve stimulators
clinical evaluation of a method for automatic detection and removal of artifacts in auditory evoked potential monitoring (de Beer et al), 381

a comparison of dynamic and isometric force sensors for train-of-four measurement using submaximal stimulation current (Kern et al), ORIGINAL ARTICLE, 18
interference in a pulse oximeter from a nerve stimulator (Block, Stahl), 392
stabilization of the neuromuscular response when switching between different modes of nerve stimulation at surgical degrees of neuromuscular blockade (Kirkegaard-Nielsen et al), ORIGINAL ARTICLE, 317

pacemaker
pacemaker malfunction due to microcurrent injection from a bioimpedance noninvasive cardiac output monitor (Aldrete et al), CASE REPORT, 131

pulse monitors
clinical evaluation of continuous noninvasive blood pressure monitoring: accuracy and tracking capabilities (Young et al), ORIGINAL ARTICLE, 245
a recommendation to reduce intraoperative data redundancy and confusion (Calalang, Philip), 264A

pulse oximeters
arterial-pulse oximetry loops: a new method of monitoring vascular tone (Shelley), 275A
comparison of simultaneous oxygen saturation values using Nellcor N-100 and Marquette Tramscope 12 oximetry (Goldstein et al), 265A
the effect of pulsating arteries on reflectance pulse oximetry: measurements in adults and neonates (Nijland et al), ORIGINAL ARTICLE, 118
interference in a pulse oximeter from a nerve stimulator (Block, Stahl), 392
limitations of forehead pulse oximetry (Jørgensen et al), CASE REPORT, 253
motion-resistant pulse oximetry (Elfadel et al), 262A
pulse oximetry in an extensively burned patient (Imaizumi et al), CORRESPONDENCE, 80
reflectance pulse oximetry at the forehead improves by pressure on the probe (Dassel et al), ORIGINAL ARTICLE, 237

reflectance oximeters
intraoperative reflectance oximetry in burn patients (Sheridan et al), ORIGINAL ARTICLE, 32

refractometers
refractive indices for volatile anesthetic gases: equipment and method for calibrating vaporizers and monitors (Wallroth et al), ORIGINAL ARTICLE, 168

respiration sensors
respiratory monitoring during postoperative analgesia (Gordh et al), 365

scanners
scanning technology automates difficult airway registry (Gibby et al), 284A

spectrometers
erroneous mass spectrometer readings caused by desflurane and sevoflurane (Abel, Eisenkraft), ORIGINAL ARTICLE, 152

spectroscope
transcranial optical path length in infants by near-infrared phase-shift spectroscopy (Benaron et al), ORIGINAL ARTICLE, 109

sphygmomanometers
an alternative method of validating blood pressure measurement: the sphygmooscillographic method (Sapinski), CORRESPONDENCE, 348

electronic
clinical evaluation of the oscillometric blood pressure monitor in adults and children based on the 1992 AAMI sp-10 standards (Ling et al), ORIGINAL ARTICLE, 123

standards
clinical evaluation of the oscillometric blood pressure monitor in adults and children based on the 1992 AAMI sp-10 standards (Ling et al), ORIGINAL ARTICLE, 123
the medical information bus: is the clinician-friendly device interface standard commercially viable?, 259A

syringes
effect of hypodermic syringe resistance while using a syringe pump (Robinson), 266A
syringe resistance while finding a vein (Robinson et al), 262A
syringe slide whistles: a fantasia on medico-musical themes (Van Poznak), ORIGINAL ARTICLE, 342

thermocouples
measurement of respiratory rate and timing using a nasal thermocouple (Marks et al), ORIGINAL ARTICLE, 159

tubes
endotracheal
combined use of the esophageal-tracheal combitube with a colorimetric carbon dioxide detector for emergency intubation/ventilation (Butler et al), ORIGINAL ARTICLE, 311
tracheostomy
combined use of the esophageal-tracheal combitube with a colorimetric carbon dioxide detector for emergency intubation/ventilation (Butler et al), ORIGINAL ARTICLE, 311

ultrasound
effects of intravenous anesthetic agents on middle cerebral artery blood flow velocity during induction of general anesthesia (Thiel et al), ORIGINAL ARTICLE, 92

vaporizers
pumping effect in Ohmeda Tec 5 vaporizers (Loch, Santos), CORRESPONDENCE, 348
refractive indices for volatile anesthetic gases: equipment and method for calibrating vaporizers and monitors (Wallroth et al), ORIGINAL ARTICLE, 168

ventilators
method of delivering constant nitric oxide concentrations during full and partial ventilatory support (Putensen et al), ORIGINAL ARTICLE, 23
safety and efficacy of a ventilator database interface (Gilmour, Gove), CASE REPORT, 183

videotape recorders
an audio-video system for automated data acquisition in the clinical environment (Mackenzie et al), ORIGINAL ARTICLE, 335
